---

I am Frontend react (next.js) programmer. I graduated from the Soff study modern professions training center. I can make a variety of different sites using the react library. I actively participate in teamwork and improve my cognitive skills. I like to take risks I try to trust my knowledge when I face difficult things.

---

## Work experience

Frontend developer

November 2023 Present

I have been practicing from December 2023 to now and have made the sites queue and main sections a lot of times. During the internship, I made pages suitable for browser using CRUD, and now we are working on a large project in a team.
